The Second MOU WHA, Geneva, 15 May, 2007

The Extension of Memorandum of Understanding among the Health Ministers of the Six Mekong Basin Countries on the Mekong Basin Disease Surveillance (MBDS) Cooperation

The Memorandum of Understanding (MOU) is a revision of the first MOU on the Mekong Basin Disease Surveillance Project which was signed in November 2004. The second MOU was jointly prepared and signed by the Ministry of Health of the Kingdom of Cambodia, the People's Republic of China, the Lao People's Democratic Republic, the Union of Myanmar, the Kingdom of Thailand, and the Socialist Republic of Vietnam, hereafter referred to as "partners". The purpose of this MOU is to continue and enhance the legal and policy framework of the Mekong Basin Disease Surveillance (MBDS) in order to facilitate disease surveillance cooperation in the sub-region. Under this MOU, the partners agree that:

1. The cooperation aims to strengthen national and sub-regional capabilities to disease surveillance and outbreak response to priority diseases listed in Annex 2 of the MBDS and public health emergency of international concern as stated in International Health Regulations (IHR 2005) in order that they can be rapidly and effectively controlled. This would also provide essential information for the development of health and social policy to readily address the burden arising from these diseases.
2. The priority diseases are Dengue infections, Malaria, Plague, Scour (Dysentery including Cholera), Vaccine Preventable Diseases, HIV/AIDS and Tuberculosis, Emerging Zoonotic (like SARS and H5N1) Infections and outbreak of diseases with sub-optimal significance.
3. The scope of the cooperation includes system development, institutional and laboratory capacity strengthening, human resources development, information technology development and exchange, cross-border activities, joint outbreak response and other joint activities.
4. The MBDS cooperation recognizes that States are many other existing cooperation mechanisms on disease surveillance and outbreak response in one of the main focuses of this project. It welcomes the involvement of other institutions.
5. The MBDS cooperation is supported by an Executive Board (EB) comprising the policy and/or health ministers assigned by each of the six partners. The EB is chaired by the Coordinating Committee, comprising the contact persons assigned by the partners, which is in charge of representation and follow-up of regular activities.
6. The chairmanship of the MBDS cooperation will be shared by each partner in rotation each year.

1. A permanent coordination office will be continued in Thailand, in the most effective and convenient manner.

2. A six-year action plan will be developed and approved by the Executive Board. This will provide the structure for the implementation. The action plan can be revised at each meeting of the Executive Board.

3. The partners are committed to provide strong support to, and participate actively in the collaboration. The partners are also committed to mobilize adequate resources, nationally and internationally, to support the cooperation.

10. This MOU will be effective from the date of official endorsement by all six partners. The MOU can be revised with the agreement of the Health Ministers of the six Mekong Countries.

Done in Geneva on the 15th Day of May 2007, in duplicate in the English language for six originals.

[Signatures and names of Health Ministers from Cambodia, China, Laos, Myanmar, Thailand, and Vietnam]
